ISSUE:

Cooperative Agreement with Utah Department of Transportation for design and construction of the 1200 West Connector Road; UDOT Project # STP-LC35(155).

SYNOPSIS:

This agreement provides for the reimbursement of design and construction costs for the 1200 West Connector Road from 3300 South to 3100 South. This project is financed primarily from Federal-aid highway funds.

BACKGROUND:

Through the Wasatch Front Regional Council, the 1200 West Connector Road was selected to be funded. The total project estimate is \$3,195,323.00, with the federal share being \$2,979,000.00, and the City's matching funds at 6.77% totals \$216,323. This agreement will release the federal funds for design and construction of the roadway.

As part of this agreement, the West Valley City Engineering Division will perform the roadway design, and will be reimbursed by the federal funds. In order to receive the funding, the project must adhere to UDOT's design process. The estimate for the total design cost is \$225,270.00. West Valley City is required to pay up front, a match of 6.77% of the total design cost, or \$15,250.78, which is part of the matching funds for the whole project. Because the project will be designed by City staff, the federal funds will pay for the City's design costs, approximately \$210,019.22.

Future agreement modifications may occur to contract with other consultants for design or construction management services.

RECOMMENDATION:

Approval of the Cooperative Agreement with the Utah Department of Transportation.
